

## AEERIS LIMITED

### Commercial Agreement with Leading Australian Real Estate Group and Property Manager

---

#### Highlights

- Commercial agreement with ASX Top 50 real estate and property management group with over 140 office and industrial assets under management across Australia worth over \$18.5 billion;
- Aeeris to provide a range of services and products from its portfolio to assist with asset protection and workplace safety, including its newly launched Safe@work app and Situation Room product;
- Agreement validates the significant commercial opportunity for Aeeris in the multi-billion dollar property management industry;
- Adds to the Company's blue-chip client base, of which there are now over 110 corporate and Governmental contracts.

#### Commercial Agreement

Aeeris Limited (ASX: **AER** and 'the **Company**') is pleased to announce it has signed a commercial agreement with a Top 50 ASX listed real estate and property manager, with over 30 years experience in property investment, development and asset management.

The agreement is to provide alerting and forecasting services, delivered through the Company's leading *Geospatial Notification Information System* (GNIS) enabling the client to better plan, reduce the risk of accidents and protect its personnel and infrastructure.

Aeeris will offer a range of products from its portfolio including:

- **Regional Alerts** to warn the client when there is a natural or man-made threat to any of its properties or sites;

For personal use only

- **Situation Room** product which allows for national and regional managers to monitor threat events in real time on a national control room mapping system; and
- **Safe@work** commercial app package, which will be used by onsite facilities managers and key OHS personnel to issue notifications to workers and contractors, and to communicate any issues and hazard alerts requiring attention.

The agreement is for an initial 12 month period and will see Aeeris' products rolled out across a national portfolio of properties in the office, industrial and retail sectors. Combined there are over 140 properties worth over \$18.5 billion and the business employs over 250 property professionals who will benefit from the services.

The need for asset protection from severe weather and hazards and the need to also protect personnel both on and off-site has become increasingly prevalent within the property industry. By putting in place better monitoring and preventative measures the benefits have the potential to not only protect people and assets, and potentially improve risk management as a result of better data and information regarding asset and employee protection.

Kerry Plowright, Chairman and CEO of Aeeris Limited commented:

*"This agreement with a property industry major is further validation of our products and clearly demonstrates the need within the sector to put in place superior monitoring and preventative measures to better protect assets, most of which are highly valuable."*

*"The property industry is a significant opportunity for Aeeris and we intend to continue to focus on further commercial agreements in the sector and add to our already blue-chip client base."*

## About Aeeris

Aeeris Limited is one of the World's leading aggregators of geospatial data and provides unique location based Safety, Operations Management, Severe Weather and All Hazards data and content services.

The Company's *Early Warning Network* platform and proprietary *GNIS* technology system enable Aeeris to provide a range of critical services - Live data on natural and man-made hazards affecting our clients, various applications to protect workers and assets, aerial and ground based imaging of facilities and infrastructure, and digital tracking, mapping and monitoring of assets and personnel.

Additionally, the Company provides corporate and government clients with specific digital alerts and other content in real time regarding a range of disruptive geospatial events including storms, floods, damaging wind, hail, hurricanes and cyclones, as well as non-atmospheric hazards such as fire, tsunami, solar radiation, traffic and power outages.

Our services solve natural disaster awareness problems and promote personal and employee safety, asset protection, risk management, as well as helping to mitigate the financial impact of adverse events.

Aeeris is listed on ASX with the ticker code AER.
