

AERIS LIMITED

EWN and Esri Australia to collaborate on National Facilities Management Project

Aeeris Limited (ASX:AER), through its fully owned subsidiary, Early Warning Network Pty Ltd (EWN), has been contracted by a major client to deliver a location-based workforce and facilities management solution throughout the first half of 2019.

This leverages off EWN's experience with safe@work and its Secure Access Management System (SAMS). When combining this IP with Esri's ArcGIS Indoors platform, the project will see cutting-edge location-based intelligence introduced into facilities management.

EWN and Esri Australia will work together to deploy ArcGIS Indoors throughout a large network of Australian facilities.

About Esri Australia

Esri Australia is the country's leading location intelligence solutions company, providing products and services based on Geographic Information Systems (GIS) technology.

The company is the exclusive local distributor of Esri's world-leading ArcGIS software, used extensively throughout federal, state and local government to inform decision-making, planning and policy-making in Australia. Across many of these engagements, Esri Australia partners with major technology entities such as SAP, IBM, Microsoft and Amazon.

Through the thousands of business engagements Esri Australia has undertaken during the past four decades, it has assembled an unrivalled skill and knowledge base. As a result, Esri Australia has established a peerless reputation for successful project delivery, which in turn has placed the company at the forefront of the nation's \$2.1 billion spatial industry.

The EWN Strategy to Scale

EWN products and services are the result of around-the-clock monitoring combined with specialised technologies which track, map, analyse and communicate. The output is a unique set of spatial risk data.

Previously we supplied EWN risk data through our own software services. We discovered this was competing with customers already installed GIS applications, which was limiting sales. The shift in strategy turns that competition into opportunity, seamlessly availing our data to all GIS users and operations.

Another benefit of this approach is that we can maximise our resources and effort in the creation of high value data.

We anticipate following this announcement with further updates as we move to quickly implement our new strategy in the market place.

About Aeeris

Aeeris Limited is a leading geospatial data business.

The Company's **Early Warning Network** system and proprietary **GNIS** technology platform ingests and maps vast amounts of live data from multiple sources regarding severe weather, fire, traffic, and other geospatial hazards.

The technology allows us to track and monitor very large numbers of users, and communicate instantly with these users, especially about events which impact their safety.

Our technology enables Aeeris to provide critical services to our enterprise and government customers:

- Live data, content, alerts and notifications on natural and man-made hazards affecting our clients, including severe weather, fire and traffic conditions
- Pioneering innovative systems and apps to digitally track, monitor, map and protect workers and assets on the move with products like **Safe@Work™** and EWN's facilities management solutions

Our technology solutions provide many benefits to our clients including the ability to:

- Monitor, map and track staff, contractors, assets and operations
- Communicate with multiple staff regarding live safety hazards in real time
- Improve Workplace Health & Safety, and reduce risk and liability
- Manage personnel with regard to security, facility access, time-billing and fraud
- Improve operational efficiencies, labour scheduling and asset management

Our product offerings solve natural disaster awareness problems and promote personal and employee safety, asset protection, risk management, as well as helping to mitigate the financial impact of adverse events, geospatial hazards, personal injury, workplace safety, security breaches, fraud and inconvenience. Aeeris is listed on ASX with the ticker code AER.
